**DETAILED ACTION**

***Election/Restrictions***

***Restriction Requirement***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 10-21, drawn to a method of coating.

Group II, claim(s) 8, 9, and 10-21, drawn to a rheology modification agent.

It should be noted that claims 10-21 are listed in both Groups I and II. Those claims are improper under US practice as reciting the composition and method of use in the same claim. (MPEP 2173.05(p), II) Claims 1-7 and 10-21 also are improper as "use" claims. (MPEP 2173.05(q)). Whichever group is elected, the claims should be amended to properly set forth a method of coating or rheology modification agent.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method of Group I, claim 1, does not require all the chemical limitations of the composition of Group II, claim 8. The composition of Group II, claim 8, does not require the method of using as a SCA, but instead can be used in other methods such as controlling the rheology of a composition not used for coating.

***Species Election Requirement***

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The amines listed in claim 11 and the isocyanates listed in claim 12.

4. Applicant is required, in reply to this action, to elect a single species, i.e., **one compound**, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. The claims are deemed to correspond to the species listed above in the following manner:

The amines are listed in claim 11 and the isocyanates are listed in claim 12.

**Only one compound may be elected.**

The following claim(s) are generic: Claims 1 and 8 are generic.

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The compounds are different and would have been expected to have fundamentally different properties.

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
